

Romania Green Building Council, WWF Romania and WWF Finland are pleased to present the following training event:

Creating **GREENER** Workspaces

Listen, learn, discuss and network with the key experts and practitioners in energy efficient and ecological design and office policy.

- What:** A workshop to educate the Romanian marketplace on the advantages of green office policies, design and renovation.
- Who:** The event will be useful for executives, architects, product designers, technologists, engineers, academics, students, and others interested in exploring ways to benefit from the important shift toward energy efficient and environmentally responsible design principles.
- When:** April 22, 2009
Half day event
- Where:** Bucharest, Romania – Orange Concept Store
- How much:** Register by **April 10** and benefit from significant discounts:
25 Euros fee for RoGBC members (starting April 11, the fee is 45 Euros)
45 Euros fee for non-members (starting April 11, the fee is 65 Euros)
35 Euros fee for AmCham members (starting April 11, the fee is 55 Euros)
The registration form is available [here](#).
- Trainers:** Experts from the Romania Green Building Council and the WWF Finland's Green Office initiative.

The workshop will be interactive and will:

- Provide practical knowledge about the legislation, requirements and market demand for greener offices
- Discuss green design principles and cost considerations
- Describe ecological materials, their availability and benefits
- Highlight the benefits of flexible office design from a green perspective
- Facilitate discussions among persons making decisions regarding office spaces
- Provide information on designing and implementing an Environmental Management System and other green office policies

Training course certificates will be awarded to attendees who successfully complete the workshop.

The workshop will be in English without translation provided.

The Workshop Structure:

[13:30 - 14:00] – Registration & welcoming coffee

[14:00 - 16:00] – Session 1: Workplace trends, green office design and the latest innovations

[16:00 - 16:30] – Coffee break

[16:30 - 18:00] – Session 2: Environment Management Systems/ Green office policies

[18:00 - 20:00] – Light Dinner & Networking

Organizers:

The [Romania Green Building Council \(RoGBC\)](#) is a non-profit, non-political association of businesses encouraging the market, educational, and legislative conditions necessary to promote high performance construction that is both environmentally responsible and profitable. The RoGBC is accredited as an "Emerging Council" with the [World Green Building Council](#).

[World Wide Fund for Nature \(WWF\)](#) is one of the world's largest and most effective environmental organizations, whose mission is to stop the degradation of the natural environment, by conserving the biological diversity, by promoting sustainable use of renewable natural resources, reduction of pollution and wasteful consumption. In 1997, WWF Finland developed the Green Office, a simple and light environmental management system. More than 20,200 office employees are currently involved in the program.
